1. The following is an examiner's statement of reasons for allowance: the claimed conjugates and methods of use thereof require both: a fluorescent dye (D, D1, or D2) that comprises a xanthine, a rhodamine, or a fluorescein; and an anionic linker (L, L1, or L2) that comprises at least one anionic phosphate or anionic phosphonate. Brush et al. (US 5,986,086) disclose conjugates having an anionic linker with an anionic phosphate moiety, and a cyanine dye (see especially Fig. 1B). Bazin et al. disclose conjugates having an anionic linker with an anionic sulfonate moiety, and a fluorescent compound consisting of a rare earth cryptate. No prior art has been found teaching or suggesting a conjugate comprising both an anionic linker that comprises at least one anionic phosphate or anionic phosphonate moiety, and a xanthine, rhodamine, or fluorescein dye.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
